Advisors

Advisors to 'Marine Ecology – Progress Series' are appointed for a four-year period. They are expected to:

- critically evaluate the scientific merits of manuscripts submitted for publication
- suggest topics and authors for reviews
- select and present suitable high-quality manuscripts
- draw attention to new facts, concepts and methods

In addition to the advisors listed below, about 200 referees cooperate anonymously.

ENVIRONMENTAL FACTORS

Alderdice, D., Dr.
Pacific Biological Station, Nanaimo, B.C. V9R 5K6, Canada
Responses to environmental stress

Dring, M. J., Dr.
Botany Dept, The Queen's Univ. of Belfast, Belfast BT7 1NN, Northern Ireland
Physiological ecology of algae

Egami, N. N., Prof.
Zoological Institute, Faculty of Sciences, Univ. of Tokyo, Hongo, Tokyo 113, Japan
Effects of radioactivity

Gunkel, W., Dr.
Biologische Anstalt Helgoland, D-2192 Helgoland, Federal Republic of Germany
Environmental effects on bacterial growth

Haedrich, R. L., Prof.
Memorial University of Newfoundland, St. John's, Nfld. A1B 3X9, Canada
Environmental effects on fishes

Hedgpeth, J., Prof.
5660 Montecito Avenue, Santa Rosa, Calif. 95404, USA
Temperature effects on marine organisms; interactions of organisms

Iwai, T., Prof.
Department of Fisheries, Kyoto University, Kyoto, Japan
Environmental effects on early life history and histology of fishes

Jansson, B.-O., Prof.
Askö Lab., Inst. of Mar. Ecol., Univ. of Stockholm, Box 6801, S-113 86 Stockholm, Sweden
Environmental effects on invertebrates

Lawrence, J., Prof.
Dept of Biology, Univ. of South Florida, Tampa, Fla 33620, USA
Physiological ecology of invertebrates

MacLeod, R. A., Prof.
Dept of Microbiology, MacDonald Campus of McGill Univ., MacDonald College, Que. H9X 1C0, Canada
Physiological ecology of microorganisms

Meyers, S., Prof.
Dept of Food Science, Louisiana State Univ., Baton Rouge, LA 70803, USA
Physiological ecology of microorganisms

Morita, R. Y., Prof.
Dept of Microbiology, Oregon State Univ., Corvallis, Oreg. 97331, USA
Environmental effects on microorganisms

Newell, R. C., Prof.
Institute for Marine Environmental Research, Prospect Place, The Hoe, Plymouth PL1 3DH, England
Environmental relations of intertidal animals

Nultsch, W., Prof.
Fachbereich Biologie der Philipps-Univ., Lahnberge, D-355 Marburg, Federal Republic of Germany
Light effects on plants; locomotion of microorganisms

Petersen, J. A., Dr.
Dept Ecology, Univ. Sao Paulo, Inst. Biochiencias, Caixa Postal 11.461, CEP 05421, Sao Paulo, Brazil
Physiological ecology of invertebrates

Rheinheimer, G., Prof.
Institut für Meereskunde, Univ. Kiel, Düsternbrooker Weg 20, D-2300 Kiel, Federal Republic of Germany
Environmental effects on microorganisms

Scheltema, R. S., Dr.
Woods Hole Oceanographic Institution, Woods Hole, MA 02543, USA
Biogeography and evolution of benthic invertebrates

Segal, E., Prof.
Dept of Biology, California State Univ., Northridge, Calif. 91330, USA
Physiological ecology of invertebrates

Southward, A. J., Dr.
The Laboratory, Citadel Hill, Plymouth PL1 2PB, England
Environmental effects on invertebrates

Tokin, I. B., Prof.
Faculty of Applied Mathematics, Leningrad University, Library Square 2, Leningrad, Petrodvoretz, 198904, USSR
Environmental effects on functional cytology

Vernberg, J., Prof.
Belle W. Baruch Institute for Marine Biol. and Coastal Res., Univ. of South Carolina, Columbia, S. C. 29208, USA
Physiological ecology of invertebrates

Winter, J. E., Dr.
Instituto de Zoología, Univ. Austral de Chile, Casilla 567, Valdivia, Chile
Physiological ecology of invertebrates

Woodhead, D. S., Dr.
Ministry of Agriculture, Fisheries and Food, Fisheries Radiobiological Lab., Hamilton Dock, Lowestoft, Suffolk NR32 1DA, England
Effects of radioactivity

MARINE ECOLOGY – PROGRESS SERIES

History: Marine Ecology – Progress Series' was established in response to requests from numerous marine ecologists from all over the world. The series is based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne and published by John Wiley & Sons.

Aim: 'Marine Ecology – Progress Series' serves as world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers microbiology, botany, zoology, ecosystem research, biological oceanography, fisheries, aquaculture, pollution, environmental protection, diseases, conservation and resource management.
Ecological resèarch has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. 'Marine Ecology – Progress Series' strives for

- ○ complete coverage of the field of marine ecology
- ○ the highest possible quality of papers
- ○ quick publication
- ○ a high technical standard of presentation.

Editor and publisher attempt to achieve these goals in close cooperation with advisors, contributors and readers. Criticism and advice are cordially invited (please address to the editor).

Scope: 'Marine Ecology – Progress Series' is international and interdisciplinary. Presenting research papers, reviews and short notes, it has been created for prompt publication of contributions concerned with:

I. Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

II. Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behaviour.

III. Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

IV. Dynamics: Production, transformation, and decomposition of organic matter in marine ecosystems; food webs; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral-reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological modelling; evolution. Diseases of marine organisms.

V. Ocean Management: Organismic zonations and assemblages; worldwide marine organic resources; all aspects of fisheries; pollution of marine environments; protection of life in the seas; management of populations, species and ecosystems; management of coastal zones and sea areas.

Manuscript Preparation, Mailing and Processing

Preparation

Research papers (in general not exceeding 10 printed pages), reviews (in general up to 40 printed pages) and short notes (1–3 printed pages) must be typewritten with double spacing. 'Marine Ecology – Progress Series' invites interpretative rather than descriptive contributions. Reviews should be critical, instructive evaluations of the state-of-the-art – not mere compilations of information.

Abstracts. All contributions must be preceded by a brief, concise abstract. In the shortest possible way, the abstract should outline the scope of the paper and highlight its main results and conclusions.

Figures must be very carefully prepared, numbered and accompanied by brief, precise legends. For examples consult recent issues. Mark desired position of figures in the manuscript margin.

Tables should not be excessive in size. They must be numbered and be headed by brief, compendious legends. Mark desired position of tables in the manuscript margin. Unusual symbols used must be explained.

Genus and species names: underline for *italics*. Genus names should appear in full the first time mentioned in a given paragraph.

Citation of literature. All literature quoted in the text must be listed, in alphabetical order of author names, at the end of the manuscript. Please abbreviate publications according to 'World List of Scientific Periodicals', latest edition, London. For examples of literature citation see below.

Mailing

Address manuscripts (original plus 2 copies) to an advisor or to the editor. For safety use registered mail.

Processing

Manuscripts are critically evaluated by at least 3 reviewers. The editor then decides on acceptance or rejection. Acceptable manuscripts are usually returned to the author requesting consideration of comments and criticism. Present rejection rates range from 36 to 52 % for manuscripts from different parts of the world.

When an accepted manuscript is ready for publication, the author will be notified and the date of manuscript acceptance fixed. This date appears at the end of each printed contribution. Average time between acceptance and publication is 4 months.

The author receives 2 sets of proofs directly from the printer. Printing errors must be carefully corrected. At this stage, stylistic changes are not acceptable without compensatory payment. Please return 1 set of proofs by air mail.

Offprints: Sixty offprints (reprints) of each contribution will be made available free of charge. Any number of additional offprints can be purchased. For offprint prices consult the form accompanying the proofs. Orders for additional offprints must be made when returning the proof (use the form provided).

'Marine Ecology – Progress Series' levies no page charge.
